SALON LEVEL SYSTEM & SERVICES MENU

Understanding The Salon Level System

Studio 1 Salon & Day Spa has the right stylist for you. Every stylist at Studio 1 is required to attend advanced education as well as an in-salon training program. The stylists attend education all over the country such as New York and an upcoming event in Chicago.

Every month there are certain goals that each service provider is trying to achieve. One of the goals is a new request. The biggest compliment that you can give your stylist is the gift of a referral. By showing faith in their technical skill, a referral from you will help them get closer to achieving their goals.

Another way to help your stylist advance in their career is rebooking. By rebooking your next visit at the salon, your stylist has a more concrete book and can plan ahead for their guests' hair. By maintaining your style at the recommended time frame, your stylist is able to follow their guide from your last haircut and you are more likely to get a better haircut.

We search long and hard for the products that we carry at the salon. We are constantly offering the latest and greatest products for our guests. We are contractually obligated to sell the products for the prices the distributor sets. The majority of our education is funded through our product sales. We appreciate that you take your stylists professional recommendation and purchase the products they recommend from our salon.

We believe in rewarding hard work! Let's face it; these goals are hard to meet! Once your stylist has met their goals for three months in a row, they get a promotion! This is a really big deal at the salon, so you will probably see cards and flowers at your stylists' station. We want to acknowledge to everyone this extraordinary accomplishment. With this accomplishment will come a minimal price increase. That is the way your stylist will be compensated for all their hard work. This is also a way for the salon to ensure that you will still get the time and attention that you require and deserve from your stylist.

If your stylist's advancement in their career has put your salon visit out of your price range, you don't need to leave the salon. We recognize that the price advancement may be too much for some of our guests. Studio 1 Salon, along with your stylist, encourages you to see another team member that may allow you to meet your needs. This will keep your visit the same price as you are accustomed to.

In the end our goal is simple: We are here to give our guests the best visit possible, with the latest techniques and styles to help them put their best self forward.

Spray Tanning

In just minutes you can achieve beautiful bronzed skin with a certified spray tan technician. Avoid the harmful effects of too much UV of outdoor tanning and get the "off the beach color" you love! Studio 1 Salon uses Norvell tanning solutions, Amber Sun and Organic Sun. These high-quality solutions produce an express, quick-drying, natural, long-lasting tan! Radiant skin is only one spray away!

During your session at Studio 1, the technician applies a sunless tanning solution using a professional spray tan machine. The entire process takes approximately 30 minutes including dry time and instructions. Due to the cosmetic bronzers in the solution you will have immediate results. Once the bronzers (DHA) start to react with the amino acids in your skin it will begin to produce a color change. You will appear darker until the cosmetic bronzers are rinsed away in your first shower. Norvell Sunless Solutions adhere to your natural skin tone and enhance your color of skin creating a customized color on all different tones. During your session relax and enjoy the scented formula of raspberry and almond extracts.

Full Body Spray Tan
